

Real-time alerting, collaboration, and response in Microsoft Teams

MANAGE RISK ACROSS THE ENTERPRISE WITH DATAMINR PULSE AND TEAMS

Protect your business and employees with real-time alerting from Dataminr Pulse integrated with Teams. This combined solution enables you to *quickly communicate* and *collaboratively respond* to business-impacting events across all of your departments and locations. When facing risk, minutes or hours of advantage can be the difference between an effective response or significant damage to your business. Real-time alerts delivered using Teams' unmatched ability to reach across groups and locations and foster collaboration, save valuable time and help build a more resilient organization.

MINIMIZE BUSINESS DISRUPTION WITH DATAMINR PULSE

Dataminr Pulse helps organizations **know critical information first**, respond with confidence, and manage risk more effectively.

Dataminr Pulse offers more sources – from global to hyperlocal – **and the fastest real-time AI alerting** in the industry to help discover critical events as they unfold.

Companies around the globe turn to Dataminr to inform their risk and security operations and give them insights to be better prepared and manage any crisis.

TEAMS CONNECTS GROUPS, DEPARTMENTS, AND LOCATIONS ACROSS YOUR ORGANIZATION

Security teams can share Dataminr Pulse alerts on Teams to keep everyone up to date with the information they need to stay safe.

Share alerts, connect, collaborate, and coordinate timely responses with anyone, from any department, anywhere on Teams.

Tailor alerts to specific regions, including to employees traveling to those locations to maximize awareness.

Dataminr Pulse integrated with Teams delivers impact across the organization — from corporate security and operations to supply chain, HR, and beyond.

REAL-TIME ALERTS RELEVANT TO YOUR BUSINESS AND USE CASE

Dataminr Pulse provides high-quality alerts aligned to your business needs. From protecting the safety of your employees and locations, to keeping travellers safe, to allowing your security teams to collaborate across regions, alerts are timely, relevant, and actionable. Our alerts integrated with Teams' unmatched communication and collaboration tools allow you to reach people in all locations in real time to efficiently coordinate an organized response.

MITIGATE RISK AND INCREASE RETURNS WITH REAL-TIME ALERTS ON TEAMS

Monitor potential risk from over 500K sources from global to hyperlocal.

Discover quickly so, you'll know first. Our real-time event discovery is unmatched.

Respond faster to minimize business disruptions and keep people and assets safe.

Collaborate across departments and locations and manage risk with Dataminr Pulse integrated with Teams.

Increase returns with ROI that can be as high as 421%, with a payback period of less than six months (*).

DATAMINR PULSE AT WORK IN TEAMS CHANNELS

Operationalize Dataminr alerts through Teams' unparalleled workflow capabilities:

Notify and engage cross-functional stakeholders: Deliver real-time alerts to users who wouldn't usually have access to or engage with security information.

Collaborate across security teams: Enable security analysts across global locations to share and collaborate on alerts in real time.

Notify and engage employees: Create Teams channels to deliver alerts to employees and executives traveling to keep them informed and safe along their itineraries.

G2's 2023 Winter Reports are out, and Dataminr earned 23 badges, including **Best Support**, **Leader in Enterprise**, **Easiest Admin**, and **Easiest to do Business With**.
